Education

Veermata Jijabai Technological Institute, Matunga

Sep. 2024 – Present

Third-Year B.Tech in Information Technology | CGPA: **9.49**

Wilson College of Arts, Commerce and Science

Aug. 2022 – May 2024

MHT-CET: **99.94%ile (Rank 153)** | HSC: **93.5%** | JEE Mains: **97.6%ile**

Relevant Coursework

- | | | | |
|---------------------|---------------------------|-------------------------|----------------|
| • DSA | • Discrete Mathematics | • Operating Systems | • DBMS |
| • Computer Networks | • Deep Learning | • Theory of Computation | • COA |
| • Linear Algebra | • Artificial Intelligence | • Machine Learning | • Cryptography |

Projects

Train Your Foes 📄 | C#, Unity

Jul. 2025 – Oct. 2025

- Engineered a professional **2D platformer** game featuring **turn-based combat** with dynamic player and enemy interactions. Designed and optimised modular Unity components including Assets, Prefabs, and Scenes for scalable development.
- Implemented **Q-Learning** reinforcement AI for the boss character, enabling adaptive battle strategies and increasing the win rate from **20–30%** to **85–90%**.
- Performed iterative testing and debugging with multiple playtesters to identify and resolve performance and gameplay issues.

BSQL : Custom SQL Journey 📄 | C++, CMake

Jul. 2026 – Sep. 2026

- Architected a file-backed C++20 storage engine** from scratch, implementing a page-based disk manager and an LRU buffer pool to handle binary serialization, memory management, and OS-level I/O operations.
- Engineered a Volcano-model execution pipeline** and a hand-written SQL parser using Trie structures, capable of reliably interpreting, validating, and executing **13 core SQL** commands across custom tuple and schema abstractions.
- Developed a cross-platform, Vim-style modal CLI** using custom terminal I/O. Structured the extensive CMake codebase across 5 modular phases, integrating a system catalog entirely without external database libraries.

AI-Powered Device Health Monitor 📄 | PyQt5, Streamlit, Supabase, ChromaDB, RAG

Nov. 2025 – Jan. 2026

- Architected a distributed diagnostics platform combining a **PyQt5** desktop agent for real-time telemetry with a **Streamlit** cloud dashboard. User data is secured on **Supabase** behind **Google OAuth** for integrity.
- Integrated an **Agentic AI** engine using **RAG (ChromaDB)** to autonomously diagnose anomalies by correlating live metrics with technical documentation.
- Converted **.pt** models to **.onnx** format for lightweight performance on the desktop app, reducing inference time from **~2 min.** to **~30 sec.** — a **75%** reduction.

Technical Skills

Languages: C, C#, C++, Python, HTML/CSS, JavaScript, TypeScript, PostgreSQL, MySQL

Developer Tools: Git/GitHub, VS Code, Google Colab, Kaggle, Jupyter, Supabase, Arch Linux

Technologies/Frameworks: Unity, React, Tailwind CSS, LangChain, Streamlit, PyQt, NumPy, Pandas, Matplotlib

Achievements

- Achieved LeetCode **Guardian** and reached a peak rating of **2259**. [Profile](#).
- Achieved Codeforces **Expert** and reached a peak rating of **1772**. [Profile](#).
- Ranked **279th** in IICPC 2026 Prelims and **229th** in IICPC 2026 Regionals. [Certificates](#).
- Ranked **10th** out of **300+** participants in the Code UnCode 2026 Finals.

Community Contribution

Member | CP Club, Community of Coders, VJTI

Oct. 2024 – Present

- Practised Competitive Programming under the guidance of seniors, solving over **2000** problems across platforms such as *LeetCode*, *Codeforces*, *CodeChef*, and others.
- Organised *Codehunt*, a competitive programming and treasure hunt event aimed at introducing first-year students to CP. Managed **50+** teams across a high-stakes 2.5-hour competition.

Contributor | *Project X*, VJTI

Feb. 2026 – May 2026

- Created and managed the **Xplore** repository to help freshman students learn the essentials of Git, Python, and Data Science.
- Followed GitHub Community Standards and oversaw **500+** commits and **100+** pull requests.
- Utilised GitHub Actions to efficiently and securely manage pull request workflows.
